

## We are against the reinterpretation of the constitution to approve the right of collective self-defence

We, all personnels of this University, have rights to live and work peacefully, so that we have duties to make unremitting (persistent) efforts.

We are confident that we have been contributing to peace of the world by communicating with foreign people on behalf of the Japanese people with our all spirits through our linguistic researches and educations or cultural researches and educations.

To build peaceful societies, we will mobilize citizens' thoughts, specialists' wisdoms and experiences and we have to keep our creative challenges.

The Constitution is made for people, not being made for any other.

We never accept the reinterpretation of the constitution which was decided by the government in secret session, so-called 'Cabinet Approval', without we discuss about it enough each other.

We are against the Cabinet Approval on the right of collective self-defence.
